# Rows: End-to-End AI stack for spreadsheets

Rows offers the most comprehensive AI productivity stack for spreadsheets. From PDF file uploads to full collaborative dashboards, Rows provides secure, governed, and dynamic spreadsheet automation that scales with the enterprise.

Our Approach

- Rows AI Analyst is present at every stage of spreadsheet work, from import data, prep to reporting.
- Trusted AI that complements daily tools (PDFs, csvs, xls) with reliable execution.
- Live spreadsheets that act as part of the enterprise data fabric. Connect to databases and cloud tools to get data faster and easier.
- Productivity gains across finance, sales, marketing, and operations.
- Our Agent includes flexible assistants that solve different tasks adapted to each customer's data and goals.

Proven Accuracy

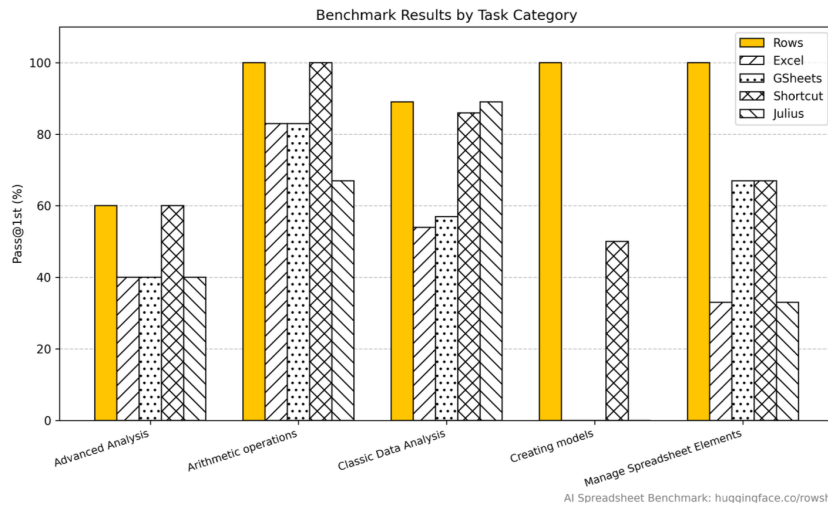

Benchmark Results by Task Category

Figure 3: Pass@1 accuracy by task category across assistants.

Rows AI Analyst achieved the highest accuracy across all categories, with an 89% first-try success rate and 74% of dynamic outputs, more than 60 points ahead of the nearest competitor in delivering live, updating results.

Our research resulted in the first-ever AI Spreadsheet Benchmark[1].

Use Cases & Benefits

- Accelerate monthly close in Finance with automated variance reports.
- Empower customer success teams with health scoring dashboards.
- Enable sales operations with incentive and quota calculators powered by live data.
- Build models in 1 request. Generate meeting follow-up dashboards from marketing and sales data, or bank transactions.
- Automate customer service reports with sentiment analysis.
- Build scorecards for clients with minimal manual effort.
- Share finance dashboards that explain costs and forecasts in real-time.
- Upload data from files, one by one or in bulk. Rows AI extracts data from PDFs and images so that you effortlessly import invoices, receipts, and extract data from business reports.

Why Rows

With Rows, business teams save time, reduce errors, and gain confidence in their data. Key benefits include:

---

[1] Rows Team; [AI Spreadsheet Benchmark](); Sept-2025

- The easiest spreadsheet available on the market, with a flexible interface available to all, and that includes all Excel features and the collaboration of Google Sheets.
- The smartest spreadsheet builder that can generate models and advanced analysis with AI. Rows token usage has been growing steadily quarter over quarter, proof of success of our users.
- Live results that update automatically when data changes.
- Trusted accuracy, benchmarked as the most reliable AI spreadsheet assistant.
- Full compatibility with Excel and Sheets formulas. Import and export as csv and xls.

Rows keeps evolving fast, and over the last year made more than 150+ improvements across the board, delivering a faster spreadsheet and the most seamless and private spreadsheet experience.
